The 2019/2020 wildfires put the plight of Australian wildlife and the realities of climate change on the international stage. This live, interactive, distance-learning event will consist of two, 1-hour seminars that explore the impact of Australian bushfires on wildlife.

- Part 1, presented by Dr Talbot, explores the basics of patient assessment and triage as well as management of pain, smoke inhalation, and burns for the unique species found in Australia.
- Part 2 will summarize Dr. Campbell-Ward's research evaluating the key rescue/rehabilitation-related wild animal welfare outcomes and ethical dilemmas encountered during the Australian bushfires. The project has generated a suite of interesting results of relevance to large scale wildlife rehabilitation efforts, veterinary and animal care worker mental health and resilience, the influence of the media in disasters, compliance with established Codes of Practice and inter-agency/stakeholder communication. To conclude, there will be a discussion centred around how the research results might be and are being incorporated into natural disaster preparedness plans for the future.

* This program is approved for 2 hours of continuing credit for veterinarians and veterinary technicians in jurisdictions that recognize American Association of Veterinary State Boards (AAVSB) Registry of Approved Continuing Education (R.A.C.E.) approval.

About LafeberVet

LafeberVet is an ever-growing online library of exotic animal medicine videos, articles, client education material, forms, questionnaires, and much more. Provided by Lafeber Company, LafeberVet is for use by veterinarians, veterinary nurses, wildlife rehabilitators, students in these fields, as well as allied professionals. Access to much of LafeberVet's content is restricted however, registration is free.

About Lafeber Company

Lafeber Company was built by a father-son team of veterinarians with a shared love of animals and a special passion for birds. Dr. T.J. Lafeber developed the very first commercial bird food pellets in the back room of his veterinary clinic in the early 1970's. Today, our exotic animal diets and critical care formulas are developed by his son, Dr. Ted Lafeber, III along with top veterinarians and nutritionists. An independent laboratory tests every diet to insure optimum pet health. Lafeber Company also consults leading experts in behavior so that our diets promote dietary enrichment.
