Anesthesia and Analgesia in Reptiles

Presenter: [Javier Nevarez](#), DVM, PhD, DACZM, DECZM
(Herpetology)

Sunday, January 28, 2024
3 pm EST (New York) (UTC -5)

[What time is this in my time zone?](#)

REGISTER NOW

Dr. Nevarez will present this live webinar as an updated version of his 2016 presentation. Topics covered will include recognizing signs of pain and discomfort, analgesics commonly used in reptiles, as well as balanced anesthetic protocols. Since a key component of successful anesthesia and analgesia is the ability to properly monitor the patient, essential monitoring parameters and equipment will also be discussed. This presentation will conclude with a review of respiratory stimulus in the reptile and anesthetic recovery.

Lecture Outline

- Definitions
- Anatomy and physiology
- Signs of Pain
- Analgesia
- Tranquilization
- Sedation
- Anesthesia
 - Indications
 - Anesthetic agents
 - Anesthetic protocols
- Intubation
- Patient monitoring
- Cardiovascular support
- Recovery

About LafeberVet

LafeberVet is an ever-growing online library of exotic animal medicine videos, articles, client education material, forms, questionnaires, and much more. Provided by Lafeber Company, LafeberVet is for use by veterinarians, veterinary nurses, wildlife rehabilitators, students in these fields, as well as allied professionals. Access to much of LafeberVet's content is restricted however, registration is free.

About Lafeber Company

Lafeber Company was built by a father-son team of veterinarians with a shared love of animals and a special passion for birds. Dr. T.J. Lafeber developed the very first commercial bird food pellets in the back room of his veterinary clinic in the early 1970s. Today, our exotic animal diets and critical care formulas are developed by his son, Dr. Ted Lafeber, III along with top veterinarians and nutritionists. An independent laboratory tests every diet to insure optimum pet health. Lafeber Company also consults leading experts in behavior so that our diets promote dietary enrichment.
