Guinea pigs are social, herbivorous rodents that are both a popular pet and laboratory animal throughout the world. This presentation reviews the basics of captive husbandry and clinical anatomy, as well as clinical techniques, including restraint, physical examination, venipuncture, radiography, and antibiotic therapy. Two common conditions, hypovitaminosis C and urolithiasis, will also be explored.

Lecture Outline

- I. The Basics
 - a. Captive husbandry
 - b. Clinical anatomy
- II. Clinical Techniques
- III. Common Conditions
 - a. Hypovitaminosis
 - b. Urolithiasis
